

# SUMMER SCHOOL ON BIOECONOMY

17 - 28 AUGUST 2020, VIENNA

**What are the roles of agriculture and forestry in a bio-based circular economy?**

The entire life cycle of agricultural and forestry products: energy procurement, usage of raw material, digitization, bio-food technology, recycling strategies, ethical and social aspects.

Participants analyse and critically reflect on the issues discussed, from an interdisciplinary and international perspective.

**E-Learning Preparation \* 2 Weeks Field Course in Vienna \* Lectures from ELLS-Universities \* Excursions to Examples in Austria**
